All groups work from data of topoteca (memories, photos, values, documents). The exact guide on how and what to do see <https://www.topothek.at/en/what-is-the-topotheque/>

Students will have to make 3 thematics out of such data, get to know the place and tangible heritage/traces on site, interview locals for more stories, and do:

3 urban walks connecting Fonte del Campo, Accumoli and the SAE neighborhood.

The walks will be documented in nice map leaflets, suitable for locals, tourists and decision maker to get to know the values of the past and present situation.
